Your M1 Password, M1 Cell Phone is one of the computer's most sensitive things; it is essential to know what is going on inside the computer. But your password isn't the only thing you need to protect, your cell phone is also sensitive. Hi YouTube! I need your help to go out from another boring day and I need your help to find the password of an email account. But don't be afraid, it's so easy to pass, I can help you! First of all, you must know that your computer's BIOS is the computer's Basic Input/Output System, which is responsible for running your computer in the very beginning, such as: 1 - The operating system stored on the computer's hard drive (also known as boot sector) 2 - The startup applications that you will use on your computer 3 - The application menu 4 - The operating system of your computer is not damaged, if you can't get into your computer. Find your Password with Password Sieve!!! Here is the main steps to follow to take you to the way out of your computer problems: First, before going any further, you should know that the main password is a long and a simple one, so it will take a long time. Second, you can restore your computer by changing the BIOS password with a DVD from your computer's original (master) disk. Third, but the most important, you need to have a program to recover your password. I recommend the program called Password Sieve, which is the most recommended by users worldwide. First of all, this method is the easiest and most appropriate way to recover a lost password and find out your password, in three simple steps (of course, you need a Master disk to operate). Step 1) Download the program from here: Password Sieve Step 2) Install the program and extract it using WinRAR or 7-Zip. Step 3) Now, run the program and follow the instructions. Step 4) Copy and paste the password and verification code as shown in the screenshot. Step 5) Re-start your computer and you will be surprised to find out that your computer is back to work again! How to Recover your Password with Password Sieve 3.0 I saw a nice video which is called " How to recover a lost password with Password Sieve" this video will help you to recover a lost password easily, the video is here:
