Usage: java -jar jinfo.jar Description: java -version java -version is a standard command line tool provided by the Java virtual machine. Q: Ensuring that the number of clicks are not too high I have a piece of code in python that calculates the sales revenue of an organization. I need to ensure that the number of clicks on a link (lets say it is a button) is not too high, and the revenue should be calculated only once. I have done the following: I have created a view called Home and this view contains a link called Sales. Then I created a function called calculate in views.py in the home directory, def calculate(request): # Here we get the parameters passed by view.py sales = request.GET.get("sales") # These are calculated values in the views.py employee\_count = 0 total\_revenue = 0 sales\_amount = 1.0 for i in range(0,sales): total\_revenue += (i\*sales\_amount) total\_revenue = int(total\_revenue) return HttpResponseRedirect("Revenues: %.2f" %(total\_revenue), status=200) And then, I have put the following code in the view.py: Calculate Here, I am planning to set a maximum limit for the number of clicks. I wanted to know what is the best way to do this? Thanks in advance! A: You can try the sessions in django, which is very easy to implement in django. You can use the session for storing the number of clicks in the user session

---

**System Requirements:**

Supported operating systems: Windows Vista Windows 7 Windows 8 DirectX: Version 9.0 For best performance, we recommend that you use a modern video card that supports DirectX 9.0 or higher. And if you want to use Doom 3: BFG Edition with DirectX 10, then you can either run it on Windows Vista or Windows 7, and the requirements are: Version 10 For best performance, we recommend that you use a modern video card that supports DirectX
