**Pimical Crack Download [Win/Mac] [Updated-2022]**

Easily create long-term plans by creating events in the calendar. Add events in any category and associate them with custom pictures. Add recurring events to your calendar for the fastest way to manage your events. How does it work? When creating new events in the calendar, your task will be added to the main calendar. By clicking on "schedule" for that event, it will appear in a time slot on your daily, weekly or monthly calendar. You will be able to edit the event from there. The times and days will be automatically inserted based on the event. Attach pictures to an event. Add a picture, logo or custom text to any event. Quickly edit all your photos at once. Create recurring events. Create a recurring event for the next week, the next month or a year. Export your calendar. Download the calendar as iCalendar or a text file. Import Google Calendar events. Import appointments from Google Calendar, iCalendar or Exchange Import events from the web. Import events from a text file. Import events from the local file system. Import events from a local database. Import events from a local database with the DAT extension. Pimical screenshot: Bulk data exporting Pimical is a software program that allows users to create scheduled appointments or events.
