A: Google has an online converter at Q: Dynamics CRM 2011 form showing views that were uninstalled We have a CRM 2011 on-premise setup where I have enabled a new form. The problem is that the view does not load when you use this form. I've opened up the file and found that the view does not exist. The name of the view does not have the 'formname-views' suffix and the forms loaded correctly. When I go to the form-page directly by entering the URL ( everything works fine. Where is the problem? How can I fix it? UPDATE: I tried creating a view and putting the form into this view. It worked. Then I created the form again in a view and put it into this form, and it did not work. So it seems that the problem is somewhere in the views. A: You have to add the view using the same method as the form (Create Linked View) and make sure the existing record has at least one field that is linking to this view. Also, you should probably open a new question for the form itself, because it's a separate issue from the view. Q: Strange error in game of life I'm new to this code and I've been having a lot of troubles with it. I have the following simple setup for the Game of Life. The problem is that the live 09e8f5149f
