

Internet Download Optimizer (IDO) can speed up downloads by up to 200% thanks to the new TCP/IP optimization logic. Its wizard detects your operating system ... and immediately applies the optimal boot settings. The program also allows you to download several files at the same time, as well as split downloaded files into several parts. Internet Download Optimizer also includes a built-in FTP client; when downloading from FTP, you can use the option to automatically navigate to a specified folder on the FTP server. The program will automatically close all active network connection after the download is complete, or save the current download session.
