[☑](#) Key Macro is a Macro recorder, Organizer and Auto-Capitalizer. You can record your typical keyboard shortcuts like Left-Alt, Shift-Control-M and Enter and save it as macro to a file. With Key Macro you can create your own keyboard shortcuts and have them ready for immediate use. Each shortcut can be assigned a shortcut key to make it quick and easy to use. Key Macro will start recording as soon as you press a combination of keys, which can be modified in the Settings. Additionally you can group several shortcuts into an macro. For each shortcut the program can change the characters it is replacing and the sequence of the keyboard keys. You can use custom regular expression patterns to define which characters get replaced. You can also create a shortcut that gets automatically inserted whenever the text gets changed. You can assign a shortcut key to a shortcut macro. Each macro can also include a title to be used as a tooltip. With Key Macro you can create your own keyboard shortcuts and have them ready for immediate use. By using the custom Regular expression patterns it is easy to change the characters that will be replaced. You can even combine different patterns for different replacements. For each replacement you can use a custom Regular expression pattern to replace all the characters in the text. The replacement can use single or double quote characters, or use the Regular expression [0-9a-zA-Z]. The numbers can be specified in any order as long as the number is used by the pattern.
