Please look at the time stamp on the story to see when it was last updated. Please enable Javascript to watch this video KANSAS CITY, Mo. -- Three people were killed and a fourth person was seriously injured Thursday after two large explosions at the former American Continental Corp. site in west Kansas City. According to the Kansas City Police Department, the first explosion happened at about 6:43 a.m. at 2624 Acorn Place. Just eight minutes later, a second explosion happened at the same location. It's not clear if either explosion was an intentional act or an accident. There were no evacuations at the site and it was later determined that there was not a significant risk to residents in the area. While police were investigating the scene at Acorn Place, a third explosion occurred at about 8:36 a.m. in an alley next to the company building. Police say that a woman was killed in that explosion and the debris from the second explosion was scattered throughout the alley. The woman's body was later removed from the scene, according to police. The cause of the first explosion has not been determined and the cause of the third explosion remains under investigation. American Continental closed the office building and the former company facility in west Kansas City in 1997. The former offices and factory now contain several industrial sites.Q: How to extract individual elements out of a map in Apache Flink This is a followup to question How to split a Flink stream in N parts using the classical map-reduce workflow Suppose we have a stream of records, and we'd like to take the first and third parts of the stream, that is, we would like to produce two streams like this Stream 1 : 0lkey1lvalue1 2lkey2lvalue2 4lkey3lvalue3 Stream 2: 0lkey4lvalue4 I have a solution

Circle Registration Code For Windows

Circle is software tool which can be used in order to help people access all their favorite websites in the same session, set the homepage and your default search engine. Clear-cut interface The installation process does not offer to download or add new third-party products, and it is over in a few seconds. Once you are done with it, the interface you come by sports a clean and intuitive design. It resembles most web browsers, as it contains an address bar and a few buttons (back, forward, home etc.). This also means that all types of people can find their way around it, without experiencing any kind of problem. Launch app in different modes, set up download location and homepage This software utility enables you to add bookmarks to all pages that interest you. In addition to that, you can set a homepage, the download folder and the default search engine (you can only choose between Google, Yahoo!, Ask, Bing). It is possible to add new windows, open HTML files, go to "Apps Center" and start the program in a safe mode. Moreover, you can access an IP detector, as well as launch a console window, so that you can easily use a command-line interface in order to execute certain actions. A private mode enables you to browse the Internet without recording all the info to history, while the debug mode opens a window and dumps information that's useful when debugging a web page. Conclusion To sum up, Circle is an efficient and pretty well-rounded piece of software. It encompasses a good response time and a user-friendly interface. It uses low to moderate CPU and RAM, which is to be expected from this type of product. Related Videos:

What's New in the Circle?

Cygwin64 is a compatibility layer for Microsoft Windows to allow UNIX programs and libraries to run on Microsoft Windows. Package name: cygwin64-1.7.2-2 Package version: 1.7.2 Package size: 5510 (4274888 bytes) Installed size: 20881 (19519488 bytes) -----
