What's New In?

A simple application that can rename a batch of files in a simple, easy to use interface. It includes a set of common actions performed on text files and converts them into new filenames based on time or date. The software is free of extra configuration, like many other similar programs are. If you are looking for an easy to use renamer that works on a batch of files at once, this is the app you need. Key Features: * Change file or directory names to a new one based on time or date (e.g. rename all PowerPoint files older than 5 days into a new one) * Exclude files by size, file type, etc * Separate file names and directory names * Preview file names before and after renaming * Rename file with multiple file prefixes at once * Automatically update default file list * Keep original file name * Uninstaller * Easy to use interface * Dual file and directory renaming * Create new files * Superb batch processing * Non-destructive operations * Works on all NTFS file systems and supports BtrFS Requirements: * Windows (XP/Vista/7/8) * Any Flash / Silverlight / Adobe / Autodesk / MODX / AnyFont Player or Adobe Reader supported * 1 GB free disk space * Internet connection to download the free software Installation: * Download the free "MultiBatch File Renamer" software from here (* After installation, open the "Batch File Renamer" in your main browser. It will show a page with an instruction video. * Uncheck all the boxes and fill the inputs with the information you want. The software will take care of the rest. * Click "Browse" and navigate to your folders which contain the files you want to rename. * Check the boxes for the files you want to rename and click the button for the first rename. The software will start the new batch of renames. * If you want to rename files in batches of more than one, click the "Set file range" button and define the start and end points of the files you want to rename. * If you need to add or remove files from the file list, click on the symbol of the folder in the right panel and drag the files to or from the list. * When finished renaming
